ENVIRONMENTAL HAZARDS & PHYSICAL FACILITY STANDARDS

CCLP § 55-40.1-256 (a) – (c) Accidental Injury Precautions

The facility shall ensure that the childcare program staff minimizes the risk of accidental injury in the following manner:

- (a) Childcare activities and premises shall take precautions not to expose children to situations that may be hazardous to the particular age or capacity of the child;
- (b) The program shall help children to increase awareness of safety practices and accident hazards and to teach the children how to avoid such risks; and
- (c) Accident prevention practices and policies shall be available in writing. The procedures and policies shall be reviewed annually, and the staff shall become familiar with the policies and practices.

Business Name: Smart Start Wurtzburg Center CCL No.: 1061

Director: Angelina Villagomez Alternate: Melany/Marisse

Inspection Date: Jan. 30, 2024 Safety Inspector: Gregorie S. Ahmed

Extension Status: _____

Age Group: INFANT TODDLER PRESCHOOL BEFORE/AFTER SCHOOL

Occupancy: 59 Enrollment: _____ No. Staff: _____

Assessment	Y	N	Recommendation	
The extension is cleaned, sanitized, organized, and safe for the children and staff.				
The extension is arranged with age-appropriate materials and equipment.				
There is a sufficient number of materials and equipment for the children.				
The arrangement provides protected areas where equipment and materials will be used with minimal interruption.				Proposed for Approval
The extension is constructed to provide air ventilation and sufficient lighting.				
Suitable room temperature is provided for the children in care.				(See Monitoring tool)
Installation of working smoke detectors are properly installed.				
The unused electrical outlet is appropriately covered.				
An evacuation exit plan is posted and shared with the children.				
Exit doors are clutter-free.		✓

Inspection on a renovated center for reopening (Smart Start Nurturing Center-I)

On January 29, 2024, at approximately 2:00 PM, Ms. Rita Olopai, a safety inspector, and I conducted a consultation at Smart Start Nurturing Center-I (SSNC-I) in Garapan, Saipan.

Ms. Angelina Villagomez (Ms. Lina), the center director, guided us from the office to the toddler's room, then to the infant room through the first door on the right. She informed us of the changes to their postings and the newly installed mini sink. Ms. Lina emphasized that although the diaper changing table had not yet arrived, they would temporarily use diaper changing mats as an alternative, sanitizing them after each use. Ms. Rita recommended that the diaper changing area be separated from the eating area for health and sanitary reasons. No other issues or discrepancies were found in the infant room.

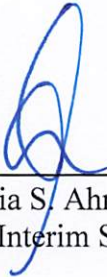

Exiting the infant room through the second door and returning to the toddler's room, Ms. Lina showed us the reconstruction of the toddler's restroom, which included a mini restroom and sink with a shower head and diaper changing mats. In the toddler activity, nap, and play area, they had installed good lighting and new dimensions of lights for naptime and activities. No other issues or discrepancies were found in the toddler room.

As we were guided to the afterschool and preschool room, we saw that Mr. Mario Flores, the custodial worker, was assisting staff in posting signs and testing electronics. Ms. Lina also pointed out that some smoke detectors had not been reinstalled because they were still being tested for defects and to determine if batteries needed to be changed. Mr. Flores shared that one container contained all the tested smoke detectors, while the other did not. As he shared this, he was also testing the smoke detectors. No other issues or discrepancies were found in the Afterschool/Preschool room.

The outdoor area still needed chairs to be removed and shelves to be organized for sports and outdoor toys. Because the outdoor play house, picnic tables and bicycles were not new, they were in good condition as we had seen, and Ms. Lina informed that they are waiting on their financial resources to proceed forth to be able to provide more for children's outdoor activity sports and activity materials.

On January 30, 2024, at around 2:58 PM, CCLP Data specialist, Ms. Adela Capati, accompanied me to conduct an inspection based on the following recommendations that were given for SSNC-I. Upon arrival, we met with Ms. Marisse who informed us that Ms. Lina would be coming soon, and showed us in. All the rooms from infant, toddler, afterschool and preschool rooms were furnished with furniture and materials in place. Contact information was posted on every room's parent/visitor information board as well as the facility's front posting board. Smoke detectors were completely installed and the "No smoking" sign was posted outside for all audience view. The inspection was done at around 3 PM, and

the facility was determined to be complying with all health and safety standards. I propose that it is safe to have it reopen with the same occupancy load of 59.
